
Seminar Learning Objectives

At the conclusion of the LCI Certification Seminar, successful candidates will:

1. Understand basic teaching principles and techniques as they apply to both children and adults, and will have demonstrated them through practice teaching during the seminar.
2. Be able to evaluate the knowledge and skills of others and know how to offer constructive criticism.
3. Be able to demonstrate competence in principles and skills of the Smart Cycling program, including vehicular cycling, bicycle equipment, bike maintenance, specialized handling maneuvers, nutrition, and specialized topics.
4. Be familiar with specific Smart Cycling materials and curricula and how cyclists will benefit from Smart Cycling classes.
5. Be able to plan and organize classes, including required equipment and supplies, audio-visual aids, course marking and the logistics of ordering materials and insurance.
6. Develop an understanding of the “need to know” principles and how they can be incorporated in customized presentations.
7. Know how to market classes, including using partners and marketing materials.
8. Possess an understanding of the organization, structure and mission of the League of American Bicyclists.
